LINKLIGHT TECHNOLOGIES

NASHVILLE &
MIDDLE TENNESSEE

CAPABILITIES OVERVIEW

Commercial Electrical & Technology Infrastructure

Practical support for commercial projects, facility upgrades and ongoing operations. We help connect power, networks, security and building technology into a coordinated scope.

A RESOURCE FOR YOUR PROJECT TEAM

01 Commercial Electrical

Electrical installation and coordination for facility projects, power requirements, equipment connections and technology pathways.

02 Structured Cabling & Fiber

Copper and fiber installation, termination, labeling and testing to support organized, dependable network infrastructure.

03 CCTV & Video Surveillance

Camera installation and troubleshooting focused on coverage, lighting conditions, recording reliability and useful video retrieval.

04 Access Control

Controlled openings, readers and controllers coordinated with door hardware, system requirements and the project team.

05 AV, Wireless & DAS

Commercial audiovisual and wireless infrastructure, including distributed antenna systems, aligned with how each space is used.

06 Infrastructure Support

Network racks, data-center infrastructure, BAS/controls pathways and troubleshooting, repair and maintenance support.

FROM SCOPE TO HANDOFF

Align the scope

Define the work, responsibilities and open questions.

Coordinate the work

Plan around access, schedules and other trades.

Verify the handoff

Agree on testing, documentation and next steps.
